ATTENTION

- Do not cover the fixture with a heat insulator etc.
- Keep distance of the fixture and objects 0.1m or more.
- Please use constant current driver.
- Connect input-side power wire to the dedicated driver directly.
- Danger! Do not remodel the fixture.
- Use within 0~35°C ambient temperature range.
- Be sure to connect a safety wire to the fixture and mounting frame.
- Because there are variations in the LEDs, emission color and brightness would be different even within the same model.
- Do not use a radio or TV near the fixture. The unit may generate noise in the radio or TV.
- Use 0-10V control dimming system (SR-2830AS-1-10V(Sold separately)) only.
- The height of inside the ceiling have to be 160mm or more to install the driver there.
- When connecting to the electric circuit, calculate the capacity in accordance with JIS C8155 standard.
- If the unevenness of the ceiling material is large, make it flat.
- Do not install in any directions other than downward.
- Do not use in high-humidity areas such as saunas.
